

*people doing strange things with electricity*

## **DORKBOT SYDNEY EXHIBITION APPLICATION**

**DUE 27th NOVEMBER**

Dorkbot-Syd is having a group show at the Sydney Artist Run Initiative Serial Space. The show will open on the 10th of February, 2010 and will run for a week, until Sunday the 14th of February.

We would like you to be involved! We are accepting applications for all kinds of work Dorkbot related. The aim of the show is to exhibit work by "people doing strange things with electricity". Submissions should not be limited to artworks only. Picture something between an art exhibition and a science fair. Some projects might involve robotics, installation, interactive installations, electronic sculpture, screen based works, audio instruments and performances. What is appealing about Dorkbot and would be great to 'exhibit' is the versatility of work that is generated from our diverse community.

Submissions of proposed work are due by 27th of November. Please fill out the details listed below and attach any additional information and material including jpegs and related URLs or video/audio links.

There are some links below for inspirational purposes.

If you have any questions relating to the show please do not hesitate to contact the Dorkbot-Syd Overlord at the details provided below.

Applications should be submitted by mail to:

**Dorkbot Show Submissions**  
**Serial Space**  
**33 Wellington St**  
**Chippendale 2008**  
**NSW Australia**

or by email as a pdf or online to:

**Pia van Gelder**  
**Dorkbot Syd Overlord**  
[dorkbotsyd@dorkbot.org](mailto:dorkbotsyd@dorkbot.org)

## **APPLICATION:**

Full name:

Phone:

Email:

Title of work:

Media:

Description of work:

Dimensions:

How is your work powered? Does it have any special power needs?

Other requirements (eg. Running water, internet connection):

How long can your piece run reliably? Can it run continuously for several hours over the course of several days? Does it need frequent maintenance?

Is this a completed work, or is it still being designed or built? If so, when do you plan to complete it?

List any elements of your work that are potentially dangerous or may cause fire/safety code problems in indoor spaces (gas engine, fire, hazardous chemicals, projectiles, etc.):

Additional information:

Note: Please attach any additional pages of description to follow this document.
